Contents

1. **Date to Date ranges filters in search pages 3**
2. **Cases searches now need at least 1 search criteria filled out..... 3**
3. **Create conversation and conversation search for non AiB users 3**

eDEN Release 1.0.7

1. Date to Date ranges filters in search pages

Search Conversations, Proposals and Reviews pages all have a From and To date field to search on. The searches were not taking into account the date fields when a search was being performed.

The search now looks at the criteria and the date fields and brings results back for anything between these dates.

2. Cases searches now need at least 1 search criteria filled out

Searches on the system need the user to complete at least one search criteria in order to complete a search now.

3. Create conversation and conversation search for non AiB users

All users can now create a conversation on a case. All users can also now search for a conversation using the conversation search facility.
