<b>3. Select all creditor bulk option button .....</b>	<b>3</b>
<b>4. Organisation dropdown performance improvement .....</b>	<b>3</b>

## **eDEN Release 1.0.8**

### **1. Progress bar updates on Debt Resolution**

When a debt on the personal application has a variance from the Debtor amount and the Creditor amount the Money Adviser has to click Resolve debt. Once Resolve has been clicked on the debt and the next button is pressed on the debt screen the debts section will now turn green on the personal application.

### **2. Tasklist queries are truncated to load faster**

Tasklists now only show the first 50 cases this is work around and will be changed back in a future release but will help load the home page at present.

### **3. Select all creditor bulk option button**

When creating a Bulk Transfer of Creditor there is now a Select All button that highlights all cases in the creditor list to be changed.

### **4. Organisation dropdown performance improvement**

An organisation dropdown list is available on several pages throughout eDEN, as the list is large this was slowing down any page where the dropdown was loading. The performance of these pages have now been improved and take less time to load.
